- 1. Qualitative Information on Consolidated Financial Results for the Current Quarter
- (1) Explanation of Business Results

During the second quarter of the current consolidated cumulative period, the Japanese economy showed signs of recovery as economic activity normalized, but the economic outlook remains uncertain due to factors such as concerns about an economic slowdown overseas, the continued rise in various prices, and the impact of exchange rate fluctuations, etc.

Under this business environment, in our 9th Medium-Term Business Plan that started in April 2023, we the Amano Group set forth the management concept of "The 4th Stage Towards a 100-year Company-Initiatives for a Paradigm Shift Leading to Sustainable Management" in which we will promote DX in each business field and execute strategic investments in software-based assets, IoT, AI, etc., and further enhance our competitive advantage in terms of profitability. Furthermore, we will proactively work to solve social issues.

As a result, during the second quarter under review, net sales were \(\frac{\pmathbf{470}}{163}\) million (up 16.1\% year-on-year), operating profit was \(\frac{\pmathbf{48}}{802}\) million (up 43.0\% yoy), ordinary profit was \(\frac{\pmathbf{48}}{809}\) million (up 37.9\% yoy), and net income attributable to owners of the parent company was \(\frac{\pmathbf{45}}{557}\) million (up 50.1\% yoy).

Main factors behind the business results

- (i) At non-consolidated Amano, Parking Systems sales grew significantly indicating that the recovery trend is clearly positive. Clean Systems sales also increased significantly due to stronger sales of robotic floor scrubbers. Information Systems sales increased, reversing the decline in sales in the first quarter. Environmental Systems sales of standard dust collectors declined due to the impact of lower orders for machine tools, but large-scale systems sales grew, resulting positive overall sales.
- (ii) In domestic group companies, the consigned parking lot management service business performed well, exceeding pre-COVID results, and the cloud service business for T&A also continued to grow. The digital time stamp business continued to perform well, meeting the needs to respond to the requirements under the revised Electronic Books Preservation Act.
- (iii) In overseas markets, sales increased in North America, Europe, and Asia. In North America, Parking Systems sales increased due to the effect of new products, and earnings are also improving. In Europe, Information Systems sales performed well and grew significantly. In Asia, Parking Systems sales continued to grow in South Korea and Hong Kong.

Application of Accounting Procedures Specific to the Preparation of the Consolidated Quarterly Financial Statements

Calculation of tax expenses

These amounts of tax expenses are calculated by multiplying the pre-tax net income and loss by an estimated effective tax rate for the year, determined using reasonable methods for pre-tax income for the fiscal year including this second quarter after applying tax-effect accounting.

In cases where an estimated effective tax rate cannot be adopted, the amounts are calculated by multiplying the legal effective tax rate after adjusting significant differences that are not in the scope of temporary differences from pre-tax net income and loss.
